Week 1 Lecture Slides and Start your assignments.

Hi Everyone, It was great to see a packed lecture theatre this morning. Tutorial Allocation Many students spoke to me after the lecture about moving to tutorial 5, and this is now full and allocated. Please do not move to another tutorial otherwise. Central timetabling is updating this list and it will be reflected in Mytimetable and Canvas over the next day or two. Start your Assignment 1 Please start your Assessment task 01: The Disciplinary Matrix of Architecture. Read the instructions carefully. Email me if you have questions. The How-to video is old but still relevant. You may have separate instruction from your tutors, but bring your work in progress (physical or electronic) for discussion. Complete the reading for next week, fill in the padlet for Week 1. Look at the resources under Quicklinks on the homepage, for AI Use in this subject, your tutor and how to contact them, extensions and special consideration and referencing expectations for all assignments. Review Lecture Slides Lecture slides and recording are available on the Homepage-->Week 1 Take the ideas you find compelling and start to add these to your diagrams. Have a productive week and see you next Monday. Helen Duong Course Co-ordinator helen.duong@rmit.edu.au

Week 1 readings and padlet

Good Morning everyone, I've been made aware that canvas has not unlocked modules for the prescribed reading and padlet. I'm told this has happened as the course wouldnt open till 9am the start of the term 2. Therefore, does not need to be done for today. Please do this reading over this week and post something for next class. See you in the lecture theatre at 10. Helen Duong PP1 course coordinator

Welcome Students to Professional Practice 1.

Dear Students, To get started, please review the Landing Page in PP1 for an overview of the course, course expectations and FAQs at the bottom of the page which cover extensions etc. LECTURES will be 10:00 -12:00 on Mondays Design Hub Lecture Theatre (100.03.001). You are required to attend these lectures each week and they are discussed in the subsequent tutorial. Attending lectures in person is crucial for

your success and compulsory. Lecture recordings are available on Echo 360 are to be used as supplementary resources for review, ELP support, or managing other commitments. TUTORIALS will be DIRECTLY afterwards at 12:00 -1:30 or 1:30 -3:00 so please move promptly from the Lecture to ensure you arrive on time. Please check your class lists on Mytimetable. Tutorial 5 was opened today and does not have any students. If you are unallocated please move to this class. If you have already allocated yourself to a tutorial but wish to be part of a smaller class then, also please move to tutorial 5. FoLinks to an external siteFor . BEFORE THE FIRST LECTURE AND CLASS Look at Week 1 , complete the reading and fill in the padlet with a comment of question. Be prepared to diagram in your first class so a Laptop or paper that you can pin up will be useful. We look forward to seeing you on Monday morning. Helen Duong Course Coordinator, Lecturer

COURSE OVERVIEW

The Professional Practice stream is a core component of the architecture program, supporting design studio learning and the School of Architecture and Design's integrated practice research model.

Across two compulsory courses, students develop competencies aligned with the ACCA accreditation standards and the Australian Institute of Architects (AIA) Education Policy. The stream prepares graduates to enter professional practice under supervision, pursue registration following practical experience, and engage with the systems that shape the procurement, delivery, regulation, and value of the built environment.

Professional practice is presented as a design discipline in itself, where architects create value through practice models, project delivery, procurement, and organisational innovation. Through conceptual frameworks, case studies, industry engagement, and critical discussion, students examine the broader contexts in which architecture is conceived, negotiated, and delivered.

The stream prepares students to become informed and adaptable practitioners, whether working within established practices, interdisciplinary teams, or emerging models of architectural practice.

PROFESSIONAL PRACTICE 1

Architectural Professional Practice 1 introduces the historical, regulatory, ethical, and institutional frameworks that shape the architectural profession. Rather than treating these as procedural requirements, the course examines how they establish professional authority, responsibility, and agency.

Part 1 explores the history and regulation of the profession, including registration, professional institutes, ethics, contracts, and regulatory systems. Students develop an understanding of how

professional identity is constructed while reflecting on their own role within the profession.

Part 2 focuses on contemporary practice through the development of a Practice Manifesto. Students critically evaluate existing professional structures and propose new approaches that support more ethical, socially responsive, and environmentally responsible forms of practice.

Part 3 applies these ideas through analysis of a major historical case study, such as the Sydney Opera House. Students examine how contractual, political, and administrative decisions shape project outcomes while developing practical understanding through simulated contract administration exercises.

Guest lectures from practitioners, regulators, and industry representatives provide contemporary perspectives on the profession's evolving challenges and opportunities.

By the end of the course, students will have developed professional literacy, ethical reasoning, and critical thinking skills that enable them to understand the systems governing architectural practice, engage with contemporary professional issues, and begin defining their own approach to practice.

Do not move after class 1.

Course Expectations

As a 12 Credit point subject expect to spend (on average) **12 hours** each week (**147 hours** over the whole semester) divided into:

- 2 hour face to face lectures every week over the 12 week semester (except *Mid Semester Break*)
- 1.5-hour tutorials every week over the 12 week semester (except *Mid Semester Break*)
- 8 hours study time outside of class which includes pre-reading, summarising lectures, reviewing discussion questions, applying concepts in your assessments, looking up other resources, discussing with peers for group assessments and refining and developing your assessments for submission.

WEEKLY LECTURES Building 100.03.001 - Refer to [Syllabus](#) for Details + Dates

Week 1 Introduction Architect, Architecture + the Profession	Week 2 Models for Understanding Profesisionalism	Week 3 Architects Act ARBV	Week 4 Good + Bad Architect Media
Week 5 Building Codes	Week 6 Good + Bad Architect The Entrpreneur	Week 7 Unionism Ethics + the Collective	Week 8 Indigenous Literacy Social Impact
Week 9 Sydney Opera House	Week 10 Concept Design	Week 11 Contract Admin	Week 12 Specifications
